I want to add a custom post-installation function to my project, which will be called after the installer is finished. In my custom installer, I'm going to use an IFDEF statement to define a constant when building up the target installation folder: const FOLDER\_PATH = 'c:\bin\MSSQL-CPP3\Samples\2012'; My function will need to access this path, so I can't just hardcode it in. I've decided to use a custom script to find the installed path and pass it in as a parameter. Is this the correct way to go about doing this? This is the script: const INSTALL\_PATH = ExpandConstant('{code:FOLDER\_PATH}'); procedure OnBeforeInstall(const CurStep: TSetupComponentState); begin if (CurStep = csInstall) then
