National Bank of Antigua & Barbuda The National Bank of Antigua and Barbuda was a private, commercial bank in Antigua and Barbuda, one of the Channel Islands. It operated between 1994 and 1997. History The bank was formed in 1994 by a merger of the Antigua Bank, National Bank of the Cayman Islands and the Banco de Antigua. The merger was partly necessitated by the closure of the Antigua International Bank. The Royal Bank of Canada held a 30% stake in the Antigua Bank. The other 30% was owned by Colonial Bank, the Industrial Bank of Barbados, the Real-Inca Bank and the Maldon Bank. The bank used the Canadian model of banking, which allowed it to make use of Canadian brokerage companies like Aurobindo. This had the effect of preventing the bank from attracting deposits and controlling its own reserve requirement, and the bank failed in 1997. This was probably the first failure of a Canadian subsidiary bank in the Caribbean.
