Scripting Languages AutoCAD supports all popular programming languages including: Visual Basic, Delphi, C++, Java, C#, and C++. AutoLISP, Visual LISP, JavaScript, and AutoCAD RLIN commands are accessible through the Windows-based API. AutoCAD scripting is designed to allow AutoCAD users to extend or automate the program. AutoCAD scripting is both text and graphical. Textual scripting is run in a text editor window, and is composed of one or more statements separated by lines that end with the character #. Graphics scripting is run in an interactive "scripting" tool window that allows graphic commands to be embedded in the script.
