Basketball Stats For PC

Basketball Stats is a software application that allows users to create a database containing all the useful information about basketball games. If you want to keep track of all the events that occurred in basketball competitions, this program may be the perfect tool for you. The user interface is straightforward and you should get used to working with this program pretty quickly. The app provides many useful features that can help you edit information about the seasons on the go. You can specify the season name and add details about teams, leaders, nick names, coach, memos, and players. It is also possible to add and remove the teams and players from the list. Additional information about the players can be introduced into the database, such as number, name and memo. The project can be exported to PDF or printed. Once you have added the information about the game session, Basketball Stats automatically displays all the details in a dedicated window, which provides several configuration settings. You may list all the events occurred, manually modify team score, start or stop the timer and to choose players. It is also possible to mark the time and location of basketball shots, blocks, fouls and many other actions. It allows users to change the player's status by specifying number, defensive fouls, blocks, offensive rebounds and other options too. To sum up, Basketball Stats is a handy application that can help you gather baseball statistics in a single place. With many useful features and a clean layout, it can be used by both beginners and experts. FruityShot is a desktop application that allows users to create interesting shot charts for professional basketball players. You can view the statistical charts on your computer or print them on your own paper. FruityShot provides you with various features like 1-point (single), 3-point (triple) shots, free-throws, rebounds, steals, turnovers, blocks, assists, and so on. You can easily add new data fields and modify values in the database, which allows you to make shots that will bring you fame and fortune, for example, to make the high-score. FruityShot is a simple, intuitive program that has a very friendly interface. All the screens appear on one large screen and you should get used to working with it quickly. You can find a number of useful functions, including: - create/load shots from the database - change the icons on the screen - add new shots, as well as new statistical charts - export charts to different file formats

Basketball Stats

Basketball Stats is a free application that lets you monitor and record basketball games. This app allows you to keep track of the games you're watching and adds statistics to events. The interface of the program is simple and allows you to add information about the games from the 1st to the 99th division. You can set the title for each game session and introduce as many teams, players, fans, leaders, coaches and cheerleaders as you want. You can add memos for important actions, including the time, date, player's name, team's location, coach's name, manager, score and place. You can change the name of your team, team's flags, dates and player information. The application can also output the statistics in PDF and print formats. Basketball Stats can show the time and location of any action occurred in basketball games. You can change the player's status, number, defensive fouls, blocks, offensive rebounds, free throws and many other options. Another useful feature of the program is that you can stop the timer, time in minutes and seconds and the time of each action (one by one). Additional information is added if the player's name is not shown. The downloaded data is stored in CSV, Excel and HTML files. You can export all or some of the data to your desktop as it is and you can add different commentaries and statistics to the file. The bottom line: Basketball Stats is a simple, quick and easy-to-use application that can be used by both beginners and advanced users. It will improve your experience and allow you to keep track of all the events that occur in basketball games. Basketball Statistics is a free application that allows you to monitor and record basketball games. Basketball Stats is a simple and clean application that keeps track of all the important game-related statistics. The interface of the software is easy to use, and you can quickly add different game elements and design it the way you want.
